## Teaching

I taught for 37 years at the University of Iceland, both in the Department of Linguistics and in the Department of Icelandic. I have taught more than 30 different courses – undergraduate courses on Phonetics, Phonology, Morphology, Syntax, Corpus Linguistics, Linguistic Methods, and Composition, and graduate courses on Phonology, Morphology, Syntax (both synchronic and diachronic), Corpus Linguistics, and Natural Language Processing.

I have been active in developing teaching material and teaching methods. I have written textbooks on Icelandic phonetics, generative phonology and generative morphology for use at the university level. I was also a pioneer in distance education at the Department of Icelandic (and in fact at the University as a whole) in 1999. Towards the end of my teaching career, I experimented with flipped teaching and with using MOOCs from other universities as an integrated part of my own courses.

## Research

In the beginning of my research career around 1980, I worked mainly on syntax. I have published several papers on Icelandic syntax, especially diachronic and historical syntax, but also some synchronic papers. Between 2005 and 2015, I was member of a several domestic and Nordic collaborative projects and networks on syntactic variation, such as “Variation in Syntax” (“Tilbrigði í setningagerð”), “ScanDiaSyn” (“Scandinavian Dialect Syntax”), “NORMS” (“Nordic Center of Excellence in Microcomparative Syntax”), “NLVN” (“Nordic Language Variation Network”), and “N’CLAV” (“Nordic Collaboration on Language Variation Studies”). I have also written articles and textbooks on Modern Icelandic phonetics, phonology and morphology.

In the 1990s, my work on Old Icelandic corpora led me towards corpus linguistics. I was chief editor of the *Concordance to the Icelandic Family Sagas*, which was published on a CD in 1996. Around the turn of the century, I became a pioneer in language technology at the University of Iceland and have since then participated in a number of language technology projects, many of which have received external funding. The largest of these was “Viable Language Technology Beyond English” which received a three year Grant of Excellence from the Icelandic Research Fund in 2009. I was PI of that project.

In recent years, I have become increasingly interested in language variation, language contact, and language change, and the effects that radical sociological and technological changes might have on the Icelandic language, especially within the digital domain. Together with Professor Sigríður Sigurjónsdóttir, I was PI of a project entitled “Modeling the Linguistic Consequences of Digital Language Contact”, which received a three year Grant of Excellence from the Icelandic Research Fund in 2016.

## Language Technology R&D Work

I have cooperated with companies from the software and telecommunications industry and with people from the disabled community on various projects. In the beginning of the century, I took part in a number of projects financed by the National Language Technology Programme which was operative from 2000-2004. From 2010-2012, I was member of an Icelandic team which cooperated with Google on the building of an Icelandic speech recognition system for Android smartphones, and cooperated with the Icelandic Organization of the Visually Impaired and Ivona Software (now subsidiary of Amazon) on a new text-to-speech system for Icelandic. From 2017-2019, I was board member of the self-owned foundation “Almannarómur” which has been commissioned by the Ministry of Education, Science and Culture to administer the current National Language Technology Programme.

Since the turn of the century, I have taken active part in Nordic/Baltic and European cooperation in language technology and participated in several projects and networks in this area. I was Icelandic representative on the Board of the “Nordic Graduate School of Language Technology” (NGSLT) from 2004-2009. From 2011-2013, I led the Icelandic part of the EU funded “META-NORD” project, which was a part of “META-NET”. Since 2015, I am National Anchor Point for “European Language Resource Coordination” (ELRC), since November 2018, I am CLARIN National Coordinator for Iceland at CLARIN-IS, and since 2019, I am Icelandic National Competence Center Lead for “European Language Grid” (ELRC).
